What makes Samsung special?

Quality devices

From TVs to laptops, phones to earbuds, Samsung products all share the characteristics of clean design, robust build quality, long term reliability and smart innovation.

For businesses, this means benefiting from new and exciting tech, including 5G and Wi-Fi 6E connectivity, smart adaptive batteries and integrated AI. This is before we mention Samsung's famous AMOLED displays, renowned across the world for their unrivalled quality.

Brilliant accessories

A quality experience depends on more than just the core device itself. That's why Samsung devotes significant care and attention to accessories. Whether you're after adapters, keyboards or cases, with specifically designed options available for Galaxy Book and Chromebook devices, you can always find what you need.

Smart supporting services

By choosing Samsung for business, you'll gain access to its UK-based free Business Service Centre. There, you can get unlimited technical support, regardless of your query. Plus, all Galaxy Books come with a three-year manufacturer's warranty, while Samsung Chromebooks get 12 months.

If that's not enough, you can also opt for three-years Enhanced Service, which adds next business day replacement devices and annual Knox health checks to ensure everything is working correctly.

A true ecosystem

The Samsung computing range connects seamlessly with the wider Samsung Galaxy ecosystem of products to enable you to work how you want, wherever you want. Switch with ease between your phone and your Samsung Galaxy Book or Samsung Chromebook. Add a monitor or use a Galaxy Tab as a second screen. No need to carry multiple wires, as Galaxy Books use the same USB-C charger that every other Samsung Galaxy product does, including phones and even the Galaxy Bud headphones.
